

**NAME**

**svn unlock** — Unlock working copy paths or URLs

**SYNOPSIS**

```
svn unlock [ --config-dir DIR ] [ --config-option OPT ] [ --force ]
           [ --no-auth-cache ] [ --non-interactive ] [ --password PWD ]
           [ --targets ] [ --trust-server-cert ] [ --username USR ] TARGET ...
```

**DESCRIPTION**

Use **--force** to break the lock.

**OPTIONS**

**--force**                      force operation to run  
**--targets**                    pass contents of file *ARG* as additional arguments

**GLOBAL OPTIONS**

**--config-dir** *DIR*        read user configuration files from directory *DIR*  
**--config-option** *OPT*    set user configuration option *OPT* in the format:  
                               FILE:SECTION:OPTION=[VALUE]  
                               For example:  
                               servers:global:http-library=serf  
**--no-auth-cache**            do not cache authentication tokens  
**--non-interactive**        do no interactive prompting  
**--password** *PWD*        specify a password *PWD*  
**--trust-server-cert**      accept unknown SSL server certificates without prompting (but only with  
                               **--non-interactive**)  
**--username** *USR*        specify a username *USR*
