

**NAME**

**svn cleanup** — Recursively clean up the working copy

**SYNOPSIS**

```
svn cleanup [ --config-dir DIR ] [ --config-option OPT ] [ --diff3-cmd ]  
            [ --no-auth-cache ] [ --non-interactive ] [ --password PWD ]  
            [ --trust-server-cert ] [ --username USR ] [ PATH ... ]
```

**DESCRIPTION**

Recursively clean up the working copy. Remove locks and resume unfinished operations.

**OPTIONS**

**--diff3-cmd**                    use *ARG* as merge command

**GLOBAL OPTIONS**

**--config-dir** *DIR*        read user configuration files from directory *DIR*

**--config-option** *OPT*    set user configuration option *OPT* in the format:  
                              FILE:SECTION:OPTION=[VALUE]  
For example:  
                              servers:global:http-library=serf

**--no-auth-cache**        do not cache authentication tokens

**--non-interactive**    do no interactive prompting

**--password** *PWD*        specify a password *PWD*

**--trust-server-cert**    accept unknown SSL server certificates without prompting (but only with  
                              **--non-interactive**)

**--username** *USR*        specify a username *USR*
